

WHY DO WE NOT HAVE PET BOTTLE DRINKS?

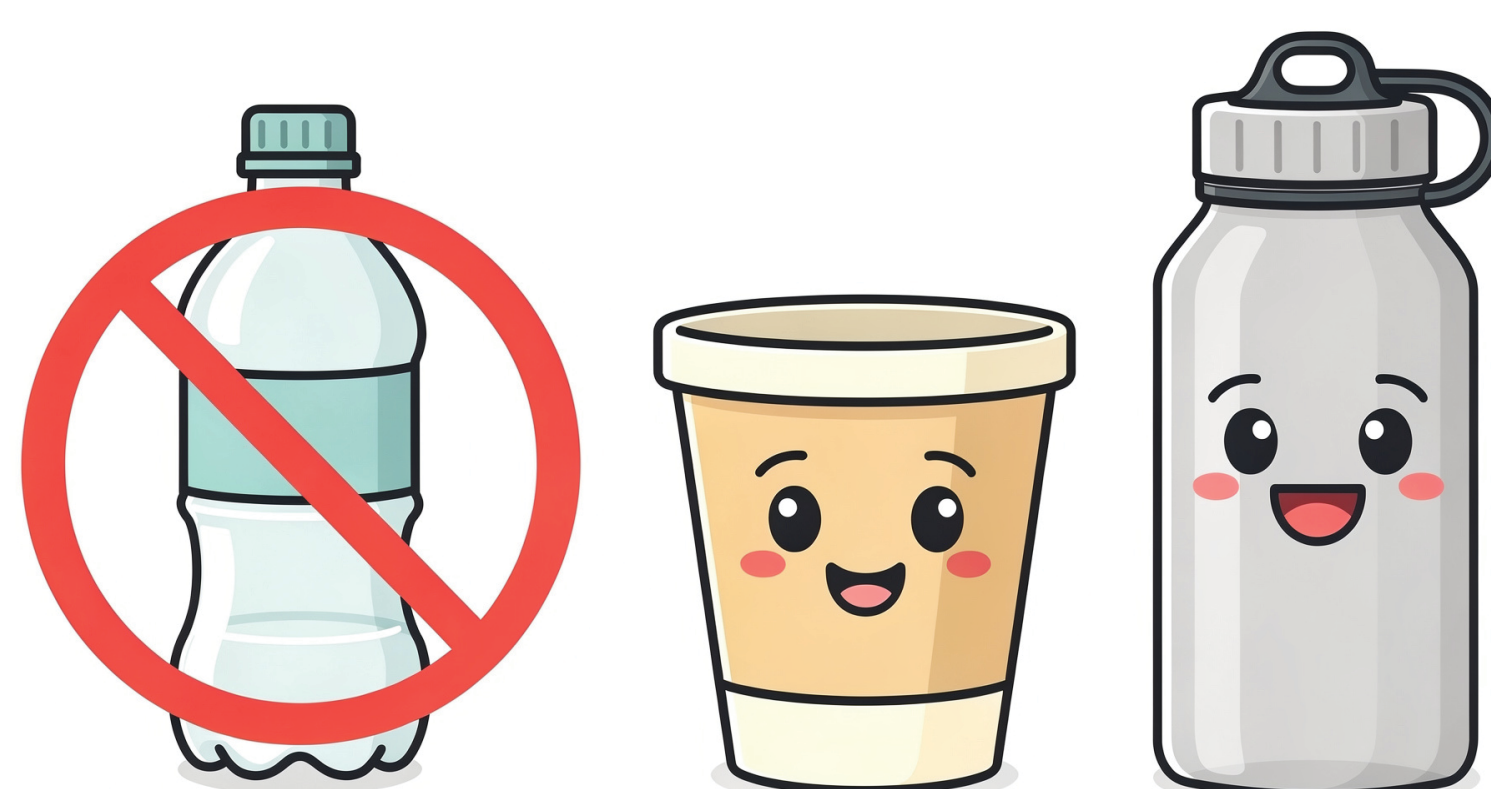

There are too many plastic bottles in the world.

Currently, there are not enough factories in the world to recycle all plastic bottles. This means that even if we all collected them selectively, there would still be plenty of bottles left.

Our solution: Prevention!

The best waste is the waste we don't even produce! We do not produce PET waste, so it does not even need to be recycled! That is why you will not find plastic bottled drinks here. Instead, we use paper cups, and you can also buy your own water bottle here.

What does this mean in numbers?

Since we stopped selling PET bottled drinks, that's 15,000 fewer bottles burdening the environment – every year.

You can help too!

Be conscious:
say no to single-use plastic!
Use a water bottle or a paper cup instead!
